

Solutions

Dynamic Dashboard

Dynamic Dashboard is our latest feature integrated into C3 Hub, offering unparalleled visibility and insights into your dock and yard operations.

This feature empowers users to conduct comprehensive analysis and make data-driven decisions. By providing concise data representations, users can easily monitor key performance indicators, facilitating efficient decision-making processes and enhancing overall productivity

CORE BENEFITS

How Dynamic Dashboard Will Improve Your Operations

Customizable Dashboard Widgets

- ✓ Tailor any screen to incorporate dashboard elements to suit your unique operational requirements with a diverse range of customizable widgets.
- ✓ Choose from an array of data representations including charts, graphs, gauges, and metrics, ensuring that your dashboard reflects the KPIs most relevant to your business.

Interactive Charts

- ✓ Gain dynamic insights through interactive charts and graphs that respond to user interactions in real-time.
- ✓ Dive deep into your data with intuitive drill-down capabilities, allowing users to explore detailed insights and identify underlying trends and patterns.
- ✓ Navigate through multiple levels of data hierarchy to pinpoint specific issues or areas of improvement, facilitating targeted interventions for enhanced performance.

Real Time Data

- ✓ Dashboard widgets react in real-time to events in the application as they occur, enabling users to monitor metrics that reflect ongoing operations and allowing them to proactively respond to challenges as they emerge.

Enhanced Visibility

Gain comprehensive visibility into dock and yard operations through customizable dashboards equipped with interactive charts and widgets.

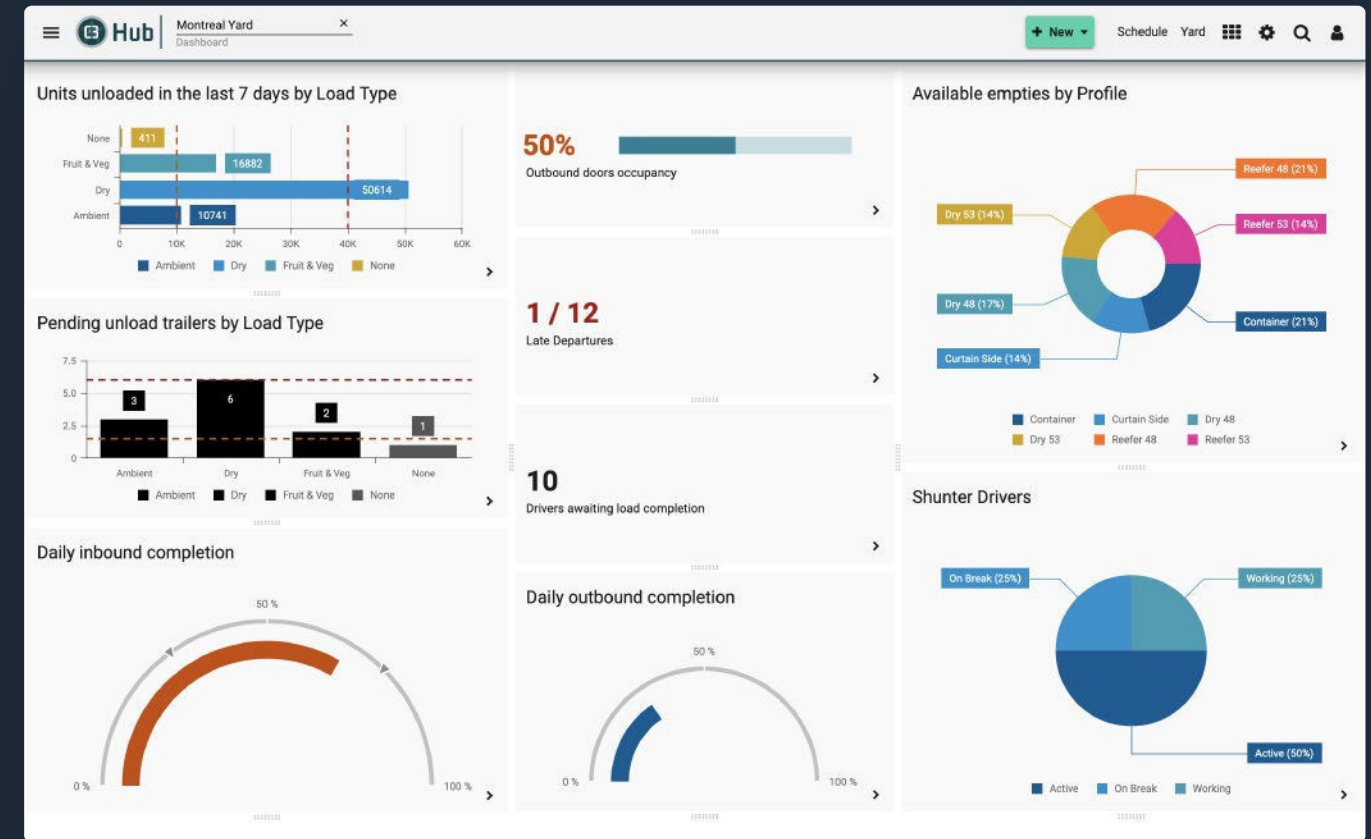

Data-Driven Decision Making

Harness the power of data to drive informed decision-making, with drill-down capabilities enabling detailed analysis and identification of actionable insights.

Improved Efficiency

Optimize operational efficiency by customizing screens to include dashboard widgets and monitor critical metrics and KPIs, facilitating proactive management and resource allocation.

How You Can Make the Best Out of Dynamic Dashboards

- ★ **Dock Turnaround Time Analysis**
Monitor dock turnaround times through customizable widgets and interactive charts, identifying bottlenecks and implementing strategies for improvement.
- ★ **Resource Allocation Management**
Track resource utilization metrics with customizable widgets, enabling efficient allocation of labor and equipment based on real-time insights.
- ★ **Performance Benchmarking**
Monitor performance against predefined benchmarks using interactive charts, facilitating continuous improvement initiatives and goal setting.
- ★ **Yard Capacity Optimization**
Analyze yard utilization using interactive charts and drill-down capabilities to identify underutilized areas and optimize space allocation.

About C3 Solutions

C3 Solutions is the leading provider of cloud-based Dock Scheduling and Yard Management systems in the supply chain & logistics industry.
