

**Hive**  
By C3 Solutions

## About C3 Hive

C3 Hive is an advanced collaboration platform for the supply chain, built to work seamlessly with our main Yard and Dock systems.

It optimizes communication, visibility, and efficiency across all site operations.

Built to meet evolving logistics challenges, C3 Hive offers real-time communication tools, site operations, and route management to help you stay ahead in today's competitive landscape.

### MAIN BENEFITS

## How C3 Hive Will Supercharge Your Processes

- ✓ **Enhanced Driver Experience**  
Simplify your onboarding process for on-site and en-route support
- ✓ **More Operational Visibility**  
Keep informed with real-time updates for proactive decision-making
- ✓ **Implement Contactless Solutions**  
Encourage driver self check-in for smooth, and safer processes.
- ✓ **Carrier Efficiency**  
Reduce your Operational Costs by reducing wait times and manual interventions
- ✓ **Achieve Greater Sustainability**  
through optimized routes and reduced emissions.

# Our Packages

## C3 Hive *Gate & Site Flow*

For companies focused on on-site driver management and security, Hive “Gate & Site” is the essential tool.

### This module includes:

#### Security Controls

Manage site access with automated gate operations, including QR code access and Automated Number Plate Recognition (ANPR).

#### Driver Communication on Site

Enhance driver experience with real-time check-ins and driver rosters.

#### Hub Flow Modifications

Adjust hub operations based on client-specific needs.

## C3 Hive *Routes*

Hive Routes is built to optimize route management and ensure efficient logistics from start to finish.

### Key features includes:

#### Advanced Route Management

Multi-step and action-based route planning to minimize delays and streamline operations.

#### Driver Roster Management

Organize and track drivers on designated routes for seamless execution.

#### Equipment Tracking and Monitoring

Ensure all equipment is in the right place, at the right time, enhancing the flow of goods.

# Maximize your ROI

### ELIMINATE UP TO

# 25%

of transport clerk tasks, removing the need for assigning drivers to routes.

### ELIMINATE

# 100%

of gate labor by eliminating data-entry and all manual processes.

### IMPROVE THROUGHOUT ON DOORS BY UP TO

# 15%

through removal of dead time caused by idle dock crew.

### ELIMINATE UP TO

# 100%

driver detention fees by ensuring on-time or early slot and vehicle optimization.

# Empower Carriers and Drivers with C3 Hive's Collaborative Platform

## Shippers

**An intelligent, automated and highly-configurable Dock Scheduling and Yard real-time visibility.**

C3 Hive gives you the added control you need to improve your sites productivity and throughput. Real-time communication with drivers before they arrive and, upon arrival, allow your operation to safely improve site velocity.

## Carriers

**A unique portal to consolidate all of your C3 Reservations, reducing multiple logins and delivering a unified view of all appointments for smarter management.**

Reduce the chance of your drivers being delayed on-site and increase your asset utilization.

## Drivers

**An easy to use, driver friendly application that keeps you on the road by minimizing delays at each of your stops.**

Gain preferred status to your customer's locations by performing pre check-ins for your appointments. Once on-site check-in with your mobile phone in the comfort of your truck.
